

Women's Health Virginia ~ 8th Annual Conference on Women's Health

**Pathways to Women's Wellness:
Integrating Conventional, Complementary & Alternative
Approaches to Prevention & Treatment**

Friday, June 3, 2005, The Place in Innsbruck, Glen Allen, Virginia

Virginia women use varied means to maintain and treat their physical and mental health — **conventional or western medical methods; complementary or alternative modalities from other medical systems or traditions; and approaches that integrate both.**

The conference is designed to raise awareness of various modalities of complementary and alternative medicine (CAM), their use by women, research regarding their effectiveness, and ways in which these modalities are used or integrated with conventional medicine to maintain wellness and prevent and treat conditions that are significant for women.
